

Advancing innovation: Introducing UL's state-of-the-art EMC and Wireless Centre

Basingstoke, United Kingdom

Empowering Trust™

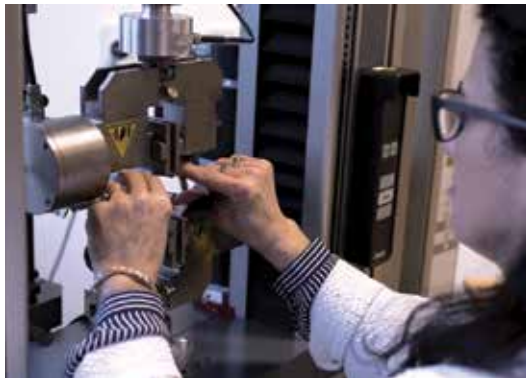

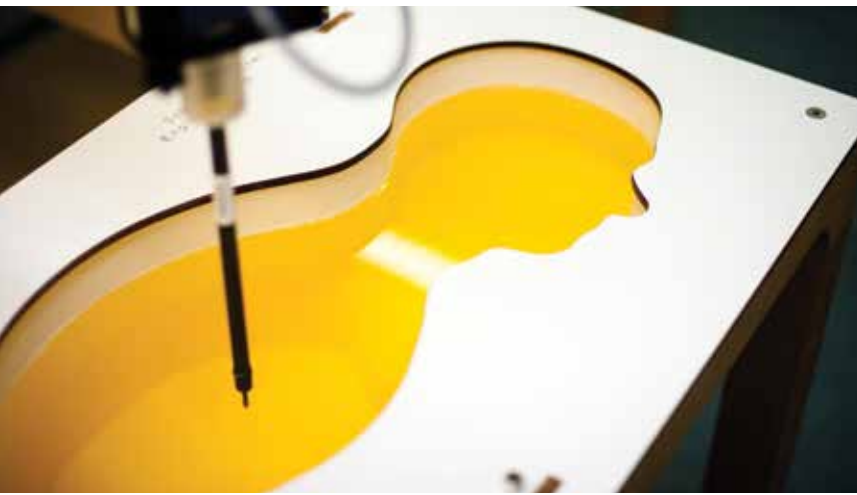

UL's newly-expanded campus

UL has significantly expanded its capabilities and capacity in Basingstoke, making it one of the largest commercial EMC and Wireless test facilities in the United Kingdom. It offers a seamless end-to-end service solution with unparalleled technical expertise across a wider range of industries.

“This is another great moment in the development of UL’s compliance services in the U.K. The significant investment in new facilities will offer a one-stop service solution with state-of-the-art, custom-designed chambers and sophisticated equipment. Due to the enormous demand we’ve seen, we’re raising the bar in terms of service excellence, and by partnering with you, our customers, we fully expect to grow and develop further. This also results in new job opportunities whether in Engineering, Sales, Marketing, Finance or HR.”

– Phil Davies, general manager Consumer Technology for EMEA LA

Ideally located in the South of England on the M3 Corridor, UL's Basingstoke facility offers unrivalled capacity and capability in the United Kingdom.

The expanded facility enables UL to leverage its service portfolio to support a broader range of industries ranging from information technology equipment (ITE), telecom, automotive, medical, and small and major appliance industries all under one roof. The newly-enhanced design of its semi-anechoic EMC chambers helps to optimize the efficiency of the radio performance testing. This, together with unique customizable automation software, helps you mitigate risk and achieve greater speed-to-market for your products and solutions.

One of the
LARGEST

UL's state-of-the-art EMC and Wireless Centre

The facility will continue to hold a comprehensive UKAS accreditation schedule, building a platform for future growth and services in line with your requirements.

Throughout the year, UL will be hosting a series of educational events and informative webinars. The events will cover a wide and relevant range of compliance topics.

If you wish to attend these events or receive more information on UL's service portfolio, please visit UL.com/basingstoke, call +44 1256 312 100 or email us at CTECH.UK@ul.com.
