

# myUL™

## A New, Full Service Client Portal

*Introducing myUL, a secure source for UL project files, product information, documents and services needed to drive your company's strategic and financial goals. An enhanced level of access to UL empowers you to make more informed, data driven decisions. Through better visibility and insights UL can help you advance the pace of innovation, drive growth and increase speed to market.*

### ONE SOURCE, FULL ACCESS

**Quotes and Orders:** Gain full visibility into quotes, orders and projects. From details and tasks, to timelines and due dates, myUL makes it easy to view and manage your overall project status, and includes features such as estimated completion percentages and notifications.

**Documents:** View *and* download your UL reports, procedures and global certifications.

**Samples:** See when UL receives your product samples, when they are returned, picked up, destroyed or archived.

**Locations:** View which companies and locations are responsible for your products.

**Inspection Reports:** View date(s), factory representative, type of product inspected, type of business, file number, inspection center and any variation notices linked to the report.

**Variation Notices:** See variation notices with links to the inspection report, including critical details on variation notices and actions needed by the applicant or manufacturer.
